Centering a <div> in CSS

1. Centering a div using flex:

```
.center {  
  display: flex;  
  justify-content: center;  
  align-items: center;  
}
```

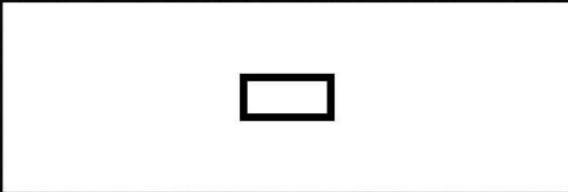

This div is centred using flex

2. Centering a div using margin property:

```
.center {  
    width: 20%;  
    height: 50px;  
    border: 5px solid #000000;  
    margin: auto;  
    position: absolute;  
    left: 0;  
    right: 0;  
    top: 0;  
    bottom: 0;  
}
```

This div is centered using the margin property.

3. Centered using the grid element:

```
.center {  
  display: grid;  
  place-items: center;  
  font-size: 25px;  
  height: 100px;  
}
```

this div is centered using the grid element.

grid

4. Centering a div using transform:

```
.center {  
    position: absolute;  
    left: 50%;  
    top: 50%;  
    transform: translate(-50%, -50%);  
    border: 5px solid #ffff00;  
    padding: 10px;  
}
```

This div is centered using
absolute property.

absolute
